

INTRODUCING

StandTall

HIGH WHEELED WALKER

The **Dynamic "StandTall"** is available in a variety of models from the basic manual rise model to the more robust power rise model.

The **"StandTall"** provides smooth rolling support for persons who are being reactivated or those cases where a rollator doesn't provide optimal support for the client.

The proper ergonomic arm positioning along with the wide range of available accessories ensures that the **"StandTall"** can be adapted to suit the needs of each individual.

The **"StandTall"** is available in a manual rise, a gas shock assisted rise and a full power rise model. The power rise models are ideally suited to users who wish to stand independently or with the assistance of a care giver.

One of these Dynamic models will surely suit the needs of your client.

Speak to your Dynamic representative today to find out more information.
