

## The Best Seat in The House

MODELS ▷ RAZ AT (attendant tilt) ▷ RAZ AP (attendant propelled) ▷ RAZ SP (self propelled)

When comfort, access, positioning, and skin care are important, RAZ is your only option. The **RAZ AT (attendant tilt) Shower Commode Chair** has a unique design which provides improved access, superior positioning and increased comfort. The adjustability, ease of tilt and durable stainless steel frame make it ideal for the home and institutional environment.

Seating for the RAZ series is a critical element. The design of the IPA seat provides optimal comfort, adjustability and pressure reduction for most users.

▷ Ischial Pelvic Alignment Seat    ▷ Swing away lateral supports

- Ischial Pelvic Alignment Seat (IPAS) provides 2" of adjustment to accommodate anterior/posterior rotation of the pelvis and maintain proper alignment of the ischial tuberosities with the aperture
- Contoured to increase pelvic stability and reduce pressures over the ischials and coccyx
- IPA seat can be easily removed for cleaning or repositioning
- 18"x16" or 18"x19" open or bridged front seats are available
- Available in 17", 20" and 24" back heights
- Also available with Visco foam interface
- Swing away lateral supports

- More options and accessories to improve comfort, support and positioning
- All RAZ frames and seats have superior access for bowel and bladder routines and hygiene
- All backrests have tension adjustable fabric and angle adjustability
- All RAZ models are made in Canada, from stainless steel and are electro-polished for durability and a long lasting finish
- Adjustable back has back angle and armrest height and angle adjustment, plus locking arm rests
- Tracking casters for AP and AT to make steering easier than any other commode
