

CHOOSING LATERAL SUPPORTS:

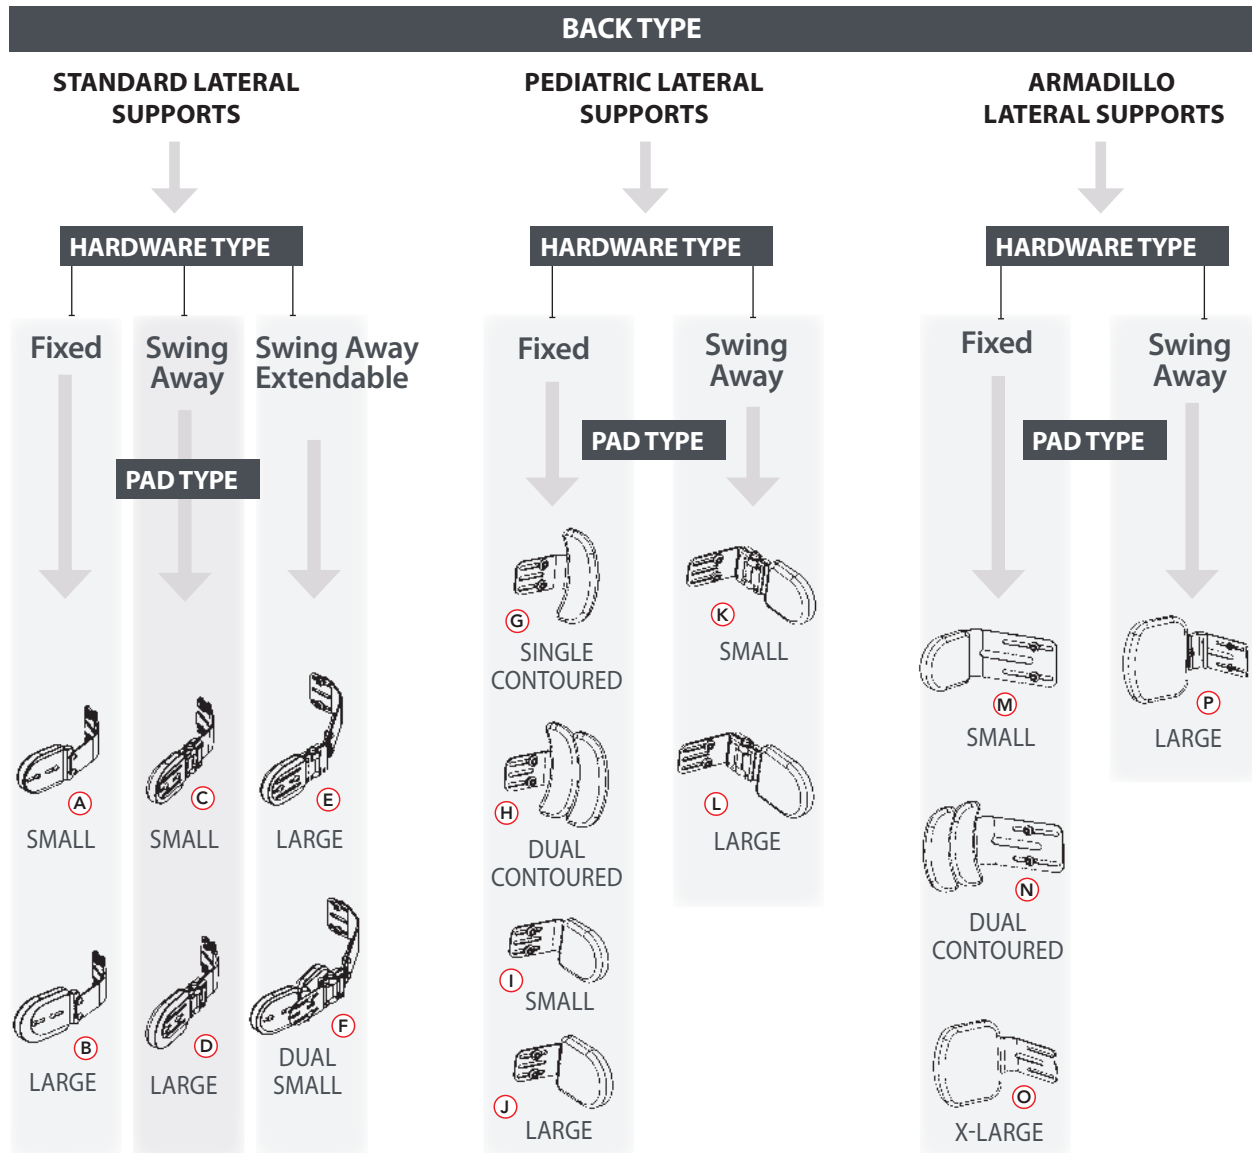

A wide range of thoracic trunk supports are available for backs supports. These included **fixed** and **swing away** options, arm styles with **single** or **dual pads** in multiple sizes. Pads are adjustable in angle, length and position. All supports have neoprene covers available.

3 TYPES OF HARDWARE

1. **FIXED** – Lateral remains fixed in place, for users that require permanent support
2. **SWING AWAY** – Lateral can be adjusted around the hinge to set proper contact point with client, in addition “swings away” on a pivot point to allow for easier transfers, or a break from support
3. **SWING AWAY EXTENDABLE (available with standard laterals only)** – Lateral has significantly more adjustability to ensure proper lateral or anterior lateral contact with client, in addition “swings away” on a pivot point to allow for easier transfers, or a break from support

5 TYPES OF PADS

1. **SMALL** – when minimal surface area of support is required - pad is approximately 3.5” deep x 3.25” high (8.9x8.3cm)
2. **SMALL DUAL ADJUSTABLE (for use on the Swing Away Extendable hardware only)** – angle between pads can be adjusted to fit the contour of and provide customized contact with the client - each pad is approximately 3.5” deep x 3.25” high (8.9x8.3cm)
3. **LARGE** – when more surface area of support is required - pad is approximately 4” deep x 3.5” high (10.2x8.9cm)
4. **CONTOUR** – when the client needs subtle lateral support added to a mild contoured back (offered in two depths, single pad or double pad) - each pad is approximately 2” deep x 5.5” high (5.1x14.0cm)
5. **XL (Armadillo only)** – maximum depth to ensure support clears the back substrate while providing increase surface area for contact with client - pad is approximately 6.5” deep x 7.5” high (16.5x19.1cm)
