üFit

Customizable Pelvic Back Support

The NXT üFit™ Pelvic Back Support can be customized to uniquely fit users with Scoliosis, Kyphosis, and other spinal irregularities requiring pelvic support.

The main foam support layer is comprised of removable/customizable üCube™ foam blocks, which can be individually removed and or cut to create the required fit that accommodates each user's unique needs. A secondary layer of foam ensures the contour is smooth and prevents exposure of the shell.

OVERVIEW

- A** Easily removable üCube™ foam blocks allows adjustability of the contour shape for a customized fit for the user (üCubes are also individually customizable by cutting them to suit the user as required).
- B** Centre foam overlay and double zipper provides easy access to adjust üCubes.
- C** Side contour foam overlays for stability and added comfort.
- D** Aluminum shell.
- E** üFit comes in both a Standard and DEEP lateral contour Depth. The DEEP offers an adjustable depth of 7.75"–8.75" (19.7–22.2 cm) for optimal midline support and positioning.

smartx^{3D}

HAS REVOLUTIONIZED NXT WHEELCHAIR CUSHIONS AND BACK SUPPORTS

Our innovative smartx3D fabric offers unprecedented comfort and durability. This advanced fabric utilizes a three-layer technology that incorporates a unique air channel middle layer that draws heat and moisture away from the material. Soft, breathable, and with moisture-wicking properties, smartx3D offers the ultimate in comfort.

- Very soft and comfortable
- Antimicrobial
- Improves immersion/envelopment
- Reduces shear
- 20 times more air permeable than standard fabrics

FEATURES

ÜCUBES STAY IN PLACE WITHOUT VELCRO!

üCubes have special pins which keep them securely attached to the aluminum shell, yet allow for easy removal. üCubes come in three different heights – the Standard 2" and Optional Kits of 1" or 3" size, providing a variety of options for customizing this unique back support.

üCube

Custom Cuts

THE ONE-HAND QUICK RELEASE

Allows the back rest to be easily removed from the chair.

PELVIC POSITIONING CUT-OUT

Provides a space for the buttocks to protrude beyond the back for a better, more natural seated position.
