**TRAKZ TUB SLIDERS CONSIST OF THREE MAJOR COMPONENTS:**

**Mobile Bases** – Include height-adjustable aluminum frame, soft contoured seat cushion, molded vinyl back upholstery, swing-away removable padded arm supports, foot supports, four dual-locking 5" (125mm) casters and commode pan. The Trakz-AT Mobile Base also includes a rotational tilt system with a range of 0° to 35° and a head support.

**Tub Base** – Includes a toolless, height-adjustable aluminum frame with horizontal stabilizers.

**Bridge** – The patented Zbrilok safety system prevents unintentional seat release from either base.

**Zbrilok™**

The patented latching safety system, Zbrilok, ensures that the sliding seat assembly cannot be moved onto the bridge, from either the tub base or mobile base, unless the bridge is fully locked to both bases. This prevents the seat assembly from being released inadvertently and potentially causing injury to the client. The Raz Trakz is the only tub slider that has this safety feature.
